

1. Strong password else system will automatically block the user
2. min 8 characters, 1 character must be Uppercase, 1 special character, Alpha Numeric
3. Use the url <https://webmail.maharashtra.gov.in>

give UserId : sevarth_Id
password : pass@123

4. now u will get screen to change the VPNDatacard Forticlient password
here give old password as pass@123
5. give new password a strong password as mentioned in point no 2

After changing password, use sevarth ID & new password for connecting forticlient vpn.

for any issues regarding password or VPNDatacard FortiClient ask user to contact SDC team.
